**PUTS YOU IN CONTROL WITH
STAINLESS STEEL**

MASS Medical Storage now offers customized hospital-grade Stainless Steel products, favored by Infection Control and OR directors for the ease of cleaning and anti-rust properties of stainless steel materials. By customizing with MASS for large OR and Sterile Core builds, you can save money and precisely meet clinical storage and infection control standards without sacrificing the specialized componentry of other MASS Medical Storage products.

**STAINLESS OR
PORTABLE WORKSTATION**

PUTS YOU IN CONTROL TO MAXIMIZE SPACE.

Sometimes you need less space for smaller supplies. **Sometimes you need more space for bigger supplies.** Sometimes you need all of that & everything in between.

In modern acute healthcare, MASS™ Medical Storage puts you in control to maximize time and productivity with an all new storage platform for optimizing your work space within our exchange storage systems. Our new transparent Lucent™ High Density Modular Storage supply trays allow you to customize and label compartments in seconds so supplies are organized, streamlined and easily accessible.

LUCENT™ HIGH DENSITY MODULAR STORAGE

- Transparent trays for better sight to equipment and supplies inside
- Customizable dividers for adjusting size of individual supply compartments
- Trays are available in varying heights
- Easy to use and see labelling system supports Kanban and Lean/JIT bar code & RFID-based inventory systems
- Meets Joint Commission standards set by Infection Control and manufacturer requirements
- More efficient storage compartments means even more efficient space, time & productivity

PUTS YOU IN CONTROL

MASS™ Medical Storage puts you in control of time, space & productivity throughout the GI Lab with a wide range of customizable solutions to store, transport and protect your Endoscopy equipment. We work with you to design and build an efficient storage system to best utilize & track inventory in various sizes & quantities including colonoscopes, EUS scopes, TEE probes, bronchoscopes, cystoscopes, laparoscopes and small or large-diameter scopes. We also offer a variety of transport & procedure carts ranging from standard, auto-clavable and motorized models.

Our systems satisfy the Joint Commission standards set by Infection Control and manufacturer requirements for storage and are the most highly compliant in the industry.

THE JOINT COMMISSION:

- 2 filtered ambient air vents
- Easy-to-clean removal drip tray
- No contact between scopes & drip tray
- Scopes separated from other scopes
- Scopes hang straight, not coiled
- Padded walls to protect distal tip

Our Secure-A-Scope cabinets feature a revolutionary new design through simple engineering, setting the standard for scope storage and accessibility.

SECURE A SCOPE:

- Simply Engineered
- Positive loading & unloading so user knows scopes are securely in place
- Highest hanging height in the industry
- Front holders rotate for easy access to rear scopes and even scope rotation
- High quality molded ABS holding system
- Contiguous holder with no welds, glues or cavities to prevent scope contamination

Mix

MASS Medical Storage already puts you in control with customized services, features and a range of materials including hospital-grade stainless steel, medical-grade laminate, & powder-coated metal. Knowing budgets also come in a wide range, MASS now offers **Mix & Match** services.

With **Mix & Match** services, you can customize your storage needs to include the Infection Control benefits of stainless steel doors with the more economical brushed aluminum laminate cabinets which have the remarkable look of stainless steel. The **Mix & Match** option affords you the style, ease of cleaning, and performance of stainless steel while still being responsible to your bottom line.

At MASS Medical Storage, we'll do anything to keep you in control.
